Louisville dividend to morrow brought support to that stock. It was said that the New York Air Brake Company had secured the contract for equipping in part at least, the New York Central Railroad with air brakes and to this may be attributed the sensational rise of the Air Brake stock.

Some of the most important interests in the street were prominent buyers after an early reaction. These purchases were largely confined to the Grangers. This was accompanied by some realizing in other quarters of the market.

Transaction in bonds were almost \$3,000,000 below yesterday's total and there is also an absence of the violent upward movement. Profit taking was evident in some of the minor speculative issues, but high grads mortgages were well maintained and advanced generally. Total sales, \$5,570,000.

The Cotton Markets.

New York, January 10.—The advancing movement inaugurated in the earlier part of last week continues unchecked and the prospects are that prices will reach a still higher level before any considerable reaction takes place. Sentiment to-day was unquestionably buillish from the start and so far as the rank and file in outside speculative circles was concerned, while professional longs showed the utmost confidence and purchased on every sign of weakness. After opening at about last night's figures prices went off several points under profit taking by scalpers and a number of the less reliant investors, following a failure of the Liverpool future market to respond as expected to our firmness yesterday. The earsier ruling was short lived, however, as the decline uncovered numerous limited buying orders. Shorts subsequently became nervous, bite advices from abread indicating a marked change for the better all around, while information from the cotton beit averaged up decidedly in favor of the by York of last week certifions we deed and the prespects are.
